## PRODUCT Coal Tar BP

CAS no. [8007-45-2]

SYNONYMS Pitch; Tar;

DEFINITION Coal Tar is a product obtained from bituminous coal by destructive distillation at about 1000°C.

CHARACTERISTICS A nearly black, viscous liquid. On exposure to air, the viscosity gradually increases. It burns in air with a luminous, sooty flame. It has a weight per ml of about 1.15 g. Slightly soluble in water; partly soluble in ethanol, in ether and in volatile oils.

TEST	SPECIFICATION
Identification	Complies with BP tests
Ash	Not more than 2.0%

STORAGE Keep container tightly closed. Keep container in a cool, well-ventilated area.
